PROTECTION PLAN

Cyber Security · Task 3

Protection Table

Password Exercise

Awareness Sign

Keeping Future Mall's systems and people safe.

FUTURE MALL — PROTECTION PLAN

Protection Table

System	Realistic Risk	Suitable Protection
Wi-Fi Network	An unauthorized person connects to the mall's Wi-Fi and uses the internet or spies on transmitted data.	Use WPA3 encryption + a strong password changed regularly + a separate network for visitors, isolated from the staff network.
Cashier System (POS)	Theft of customers' card payment data, or an unauthorized person accessing the system.	Enable Two-Factor Authentication (2FA) on cashier accounts + regular software updates + encrypt payment data.
Website	A data breach exposing customer information, or a DDoS attack that takes the website offline.	Use an SSL certificate (HTTPS) + a firewall + regular automatic backups of website data.
